

Fecotainer – fecescollector

The most reliable stool collection method

The **Fecotainer** is a user-friendly and hygienic stool collection device suitable for all kinds of stool. It is placed under the toilet seat 'before use' and can be well sealed with a stopper and lid 'after use'. Due to the simplicity of its use, the **Fecotainer** is an ideal fecescollector for largescale studies / colorectal cancer screening: its hygienic simplicity increases participation in colorectal cancer screening programs! The **Fecotainer** is collapsible and fits through a letterbox (only 28 mm high) and therefore easy to send to patients. Send us an e-mail at info@excretas.com with your request for a free sample.

- Safe for patients and laboratory workers.
- Diameter of 14,5 cm and volume of 750 ml.
- The fecescollector is from recyclable plastic.
- After laboratory use, the **Fecotainer** can be wasted as a normal disposable.
- Recommended by gastroenterologists.
- The **Fecotainer** provides the most reliable results in laboratory stool tests.
- The **Fecotainer** is a worldwide patented disposable (Class I in-vitro medical device).
- CE-marked & FDA registered.
- Produced and designed in The Netherlands.
