

Uritainer – urinecollector

The best device for urine collection

The **Uritainer** is a user-friendly and hygienic urine collection device with spout. It is placed under the toilet seat 'before use' and is a patient friendly urinecollector for children and women. Due to the simplicity of its use, the **Uritainer** is an ideal device for large scale population studies. The **Uritainer** is collapsible and fits through a letterbox (only 28mm high) and therefore easy to send to patients. Send us an e-mail at info@excretas.com with your request for a free sample.

Benefits:

- Easy urine collection for women and children.
- Easy to pour the urine in a lockable cup.
- Diameter of 14,5 cm and volume of 750 ml.
- The urinecollector is from recyclable plastic.
- After laboratory use, the **Uritainer** can be wasted as a normal disposable.
- Recommended by urologists.
- The **Uritainer** provides the most reliable results in laboratory urine tests.
- The **Uritainer** is a worldwide patented disposable (Class I in-vitro medical device).
- CE-marked & FDA registered.
- Produced and designed in The Netherlands.
